¹ Limit finansowania ulegnie obniżeniu o 25% w przypadku jednakowej zawartości DDD w opakowaniu leku wyznaczającego nowy limit finansowania oraz leku poprzednio wyznaczającego limit finansowania. W pozostałych przypadkach limit finansowania może ulec obniżeniu w mniejszym lub większym stopniu.

² Podejście to zapewni największe oszczędności dla płatnika publicznego, gdyż lek o największej DDD w opakowaniu stanowiący podstawę limitu finansowania generuje najniższy limit finansowania, a zatem maksymalne oszczędności dla płatnika publicznego

Wpływ produktu leczniczego Nevanac® (nepafenak) na zmniejszenie ryzyka wystąpienia obrzęku siatkówki, po zabiegu chirurgicznego usunięcia zaćmy u chorych na cukrzycę – analiza racjonalizacyjna
